Subject: Microsoft anti-trust trial settlements and penalties

To whom it may concern,

I am very dissatisfied with the state of settlements and penalties applied to Microsoft for the crime Bill Gates and his company perpetrated against the the software and computer industries. By eradicating his competitors in the most unfair fashion, Mr. Gates robbed us, the computer users from the benefit of better and more creative software and destroyed the income of other creative software developers in the name of greed.

I feel that the proposed settlements and penalties are very inadequate. They are too weak and do not fit the crime. They do not assure deterrence and prevention of any future recurrence of such unfair practices. They also do not address the damage done to everyone, users and developers. We must send a message that "Greed does not pay", Microsoft/Bill Gates should pay back in a way that serves every community around the states ... Mr. Gates is one of the richest man on the planet because of it, and we can't let him get away with it. He must pay the appropriate penalty and make amend in a meaningful way.

Thank you for your continued fight for justice.
